## SKILLS

- **Backend:**
  Ruby, Ruby on Rails, RESTful API, JSON, GraphQL, Sidekiq, Solid Queue, RSpec
- **Frontend:**
  Hotwire(Turbo, Stimulus), JavaScript (ES6+), React, HTML5/CSS3, JQuery, Bootstrap, Tailwind CSS
- **Databases:**
  PostgreSQL, Redis, query optimization
- **DevOps:**
  Docker, Docker Compose, Nginx, Linux
- **Tools:**
  Git, Figma, Jira, Confluence, Swagger, Agile/Scrum

## LANGUAGES

- English - B1

## GENERAL INFORMATION

I have over 3 years of commercial experience in developing and supporting web applications.
For the past two years, I have worked as a backend developer for a B2B marketplace built on Ruby on Rails.
I enjoy working with APIs, integrating third-party services, and improving the product I work on.
I value high-quality code (SOLID, DRY) and am interested in AI.
I leverage modern AI tools to automate routine tasks and accelerate development, which enhances productivity and allows me to focus on solving complex architectural challenges.
I can build a functional application from scratch, create a Docker image, deploy it to a hosting environment, and properly configure email notifications to avoid spam filters.

## MY EXPERIENCE

**BirdsBuild (bb.market)** *May 2023 - April 2025*

*Backend Ruby on Rails developer*

- Implemented generation of marketing feeds (CSV) for advertising platforms (Yandex, Google, VK, MyTarget, Facebook).
- Automated distributor reporting via Google Sheets API, including logic refactoring.
- Maintained multi-language support; created registration forms and quizzes.
- Implemented real-time data updates (WebSockets) and email notification delivery.
- Integrated with external services: Bitrix24, Google Cloud, Yandex Cloud, YouTube, Jira, Unisender.
- Integrated payment systems (Tochka Bank API).
- Maintained API documentation (Swagger) and wrote integration tests.

**AreshnikovGroup** *October 2023 - December 2023*

*Hands-on internship in Ruby on Rails 7*

- Developed a full-featured web application using Hotwire (Turbo, Stimulus).
- Implemented server-side logic and client-side interactivity within a unified Rails ecosystem.
- Applied best practices including clean architecture, testing, and code maintainability; participated in regular code reviews and received mentor feedback.

**SumatoSoft** *October 2021 - July 2022*

*Fullstack developer (Ruby on Rails, React, JavaScript, jQuery)*

- Fixed bugs, implemented new features, and refactored legacy code ensuring cross-browser compatibility.
- Worked on both backend and frontend (React, JavaScript, jQuery).
- Completed corporate English courses aimed at enhancing professional communication skills.

**Ruby on Rails Course (Rubycom)** *September 2020 - January 2021*
by leading engineers at BePaid
